

ANGLIAN FLIGHT CENTRES

NORWICH PROCEDURE

Landing at Norwich is now much cheaper for AFC aircraft (around £8 or £15) – but only if you follow one of the options in this procedure! Note that Norwich ATC now require 1 hour minimum notice of intended arrival. Also note that if you are “forced” to use one particular handling agent, this is **incorrect**. Use the procedures below which have already been agreed with all parties. ***Failure to follow every part of this procedure may make you personally liable for a hefty £50 handling fee from agents at Norwich!***

Instructors especially please note before sending students to Norwich!

Before you depart Earls Colne you **must** ensure you do the following:

1. Get the latest Norwich airfield layout plan.
2. You will need High Viz jackets – make sure you have them with you.
3. **Telephone Anglia Flight on 01603 898100.**
4. **Telephone ATC on 01603 420641** and ask for parking at Anglia Flight/Northern Apron. Make sure you state this is a training flight, and ask for the training landing rate.
5. If possible, inform Anglia Flight of any update to your ETA. This would be much appreciated.

Norwich Runway 09 arrival

The exit for Anglia Flight/Northern Apron parking is via D2. It will therefore be necessary to backtrack. In some instances it may be necessary to vacate at Charlie to the South or North and then follow ATC instructions.

Norwich Runway 27 arrival

Vacate at D2. Again if the hold is occupied it may be necessary to vacate at another hold and await instructions.

Parking at Anglia Flight (Northern Apron) after vacating at D2.

Taxy straight ahead and take the first right. Follow this taxiway until you reach the red and white marker boards. The entrance to Anglia Flight parking area (currently termed the Northern Apron by ATC) is on the left and marked by blue taxi-way markers. The parking area itself is marked by orange posts. Taxy with care on this surface, it is rough and is only slowly responding to regular rolling. Do not try to turn into a parking slot, park adjacent and

we will be there to meet you push the aircraft in (another important reason to give Anglia Flight your ETA before you depart Earls Colne)! See diagram below:

Refuelling

Norwich Airport has banned refuelling on the North side. If you require fuel we would recommend parking with Anglia Flight (Northern Apron) first and then repositioning to the Western Apron shortly before departure after arranging for the fuel bowser to meet you (which Anglia Flight can do). Tel. No. for the fuel bowser is 01603 402042. Parking for fuel is shown (right) → Use red area as first choice, then blue. Do not park further north than the blue area.

Departing

Book out with ATC by phone (01603 420641), listen to ATIS (128.625), get clearance from ATC (124.250) and then taxi to D2 after clearance has been given. Departures from 09 can go directly from D2 but departures from 27 must backtrack a suitable distance. Please note ATC will give a backtrack instruction but leave the distance to pilot's discretion.

Things to do at Norwich that don't cost the earth

We are located adjacent to the Norfolk and Norwich Aviation Museum. This is a very good museum to visit and has some very good displays as well as full size aircraft. Aircraft on display include a Vulcan, Hunter, Meteor, Lightning as well as civilian aircraft. If you don't want to visit the museum they have a tea room for light refreshments.

A short walk away is the village of Horsham St Faith which includes a Pub that serves excellent food.

If you want to visit Norwich a taxi can be arranged.

Have a good flight!
